Cycle Routes

Off road cycle tracks
Off road routes through Sefton Park and Princes Park that can be used for cycling if signed. They are good places to cycle as a family, to teach youngsters or to brush up on your own cycle skills, as well as running through some of Liverpool’s best views.

On road cycle lanes
These are marked out lanes which provide space for cyclists on the road providing direct, safer routes to key destinations. Some cycle lanes link to Advanced Stop Lines to give cyclists priority at junctions.

Radial Route 10 is a direct route from Otterspool into town. It will take you past the Bread Streets where you will get stunning views across the Mersey and the Wirral Peninsula. And best of all, you’ll be in town in less than 20 minutes!

Cycling is also great on local journeys to the library, or if you are picking up a few items from your local shops. There’s lots of cycle parking around – check the map for the closest to where you’re going.

There is also cycle parking at St Michaels and Aigburth train stations so if you are travelling further afield you can leave your bike at the station, or take it with you for free on trains throughout Merseyside.

A cycle map is also available for all of Liverpool, the Liverpool Loop Line and other areas in Merseyside including: Knowsley, Sefton, St Helens and Wirral.

To order your free copy of the Liverpool map, please call 0151 233 3001 or visit www.liverpool.gov.uk/cycling. For maps of Merseyside phone 0151 330 1253 or visit www.LetsTravelWise.org

The Merseyside Transport Partnership consists of Knowsley, Liverpool, Sefton, St Helens and Wirral Councils and Merseytravel. TravelWise is the partnership’s Campaign to help people on Merseyside make sustainable transport choices. This document has been printed on recycled paper using vegetable based inks.

Liverpool's Orbital Routes

The Orbital Routes form an essential part of the city's cycle route network and work on these routes has been supported by the European Regional Development Fund. The Inner Orbital runs past Princes Park and Sefton Park and north along Newsham Park, surrounded by fine period architecture. It also provides a direct link to the Edge Lane Corridor, including Liverpool's Innovation Park and Wavertree Technology Park. The Middle Orbital Route also provides a connection to the Edge Lane Corridor via Penny Lane along quiet residential streets.

Cycling is fast, efficient, fun and free!

Aigburth is a great place to cycle! There are lots of attractive, direct on-road and off-road links which create a choice of alternative routes that aren't possible by car. So, don't think that the route you drive to work is the route you have to cycle!

Route 56 is part of the National Cycle Network and provides an attractive route into Liverpool City Centre. At Sefton Park, you can either go through Princes Park and the Georgian Quarter, running past Liverpool Cathedral or through Priory Wood and further along Otterspool Promenade. Give them both a try!
